

Pamela Sanderson
Candidate for Rockingham County District 01,
Northwood and Nottingham

Committee to Elect Pamela Sanderson
132 Old Turnpike Road, Northwood, NH 03261
Email: psandersoncandidatenh@gmail.com
Facebook: Pamela Sanderson: Candidate

I'm a lifelong resident of New Hampshire and have lived in Northwood for the past 42 years. I believe in community service through volunteerism and have also been active in Northwood serving upon the Zoning Board of Adjustment, Budget Committee and I'm currently a member of the Board of Selectmen.

I support equitable and reasonable taxation which lowers the tax burden off of our property owners. To accomplish this, we will need representatives who will listen to NH's people and take action to help ease our communities' property tax burdens rather than constantly legislating and mandating items which financially hurt our towns. NH needs to develop and pursue realistic sources of revenue to ease property owners' burden. The State is shifting its costs downwards onto our communities and this is merely the tip of the iceberg which stands in Concord.

Are you tired of the actions at the State House which reduce funding to our towns for public education, limit our personal freedoms, health, and safety, while seemingly doing nothing more than cater to outside interests? Personally, it is amazing to find that our current representatives continually vote against the best interests of the very towns they represent.

It's time for a change.

What do I value for NH?

- Expanded housing opportunities through sustainable growth with reasonable NH Revised Statutes, and our locally controlled zoning regulations and development ordinances.
- Quality educational and vocational opportunities within our public schools for New Hampshire children via fair-funding means.
- Worker rights of collective bargaining
- Less government restrictions placed upon individual freedoms.
- Quality of life for NH residents. I oppose large scale data centers which exist to serve AI and cryptocurrency production while draining our land, water and electrical resources, and add noise and environmental pollution to our communities.
